

LENDING A HAND

Local businesses are essential for our economy. They provide employment, create entrepreneurship opportunities and support local communities and neighborhoods. They are special because they take time to make personal connections with their customers by getting to know them by name. These businesses are comprised of our neighbors and friends. Many local businesses are feeling a financial strain right now and are worried about their future. If you are able, please consider supporting those local businesses listed below owned and/or operated by our St. Margaret Mary Families.
